From 05.00–06.30 p.m.
+91-413-2336396/97/98,Ext.225
"she has been creating abundantly and incessantly, lavishly, with an inexhaustible manysidedness, republics and kingdoms and empires, philosophies and cosmogonies and sciences and creeds and arts and poems and all kinds of monuments, palaces and temples and public works, communities and societies and religious orders, laws and codes and rituals, physical sciences, psychic sciences, systems of Yoga, systems of politics and administration, arts spiritual, arts worldly, trades, industries, fine crafts, —the list is endless and in each item there is almost a plethora of activity." Sri Aurobindo

Ancient Indians had a profound knowledge on different aspects and science in Ancient India is a vast and significant topic that encompasses a rich history of discoveries, advancements, and contributions across various fields. The scientific achievements of ancient India laid the foundation for numerous modern scientific principles and practices.

These discoveries showcased the advanced intellectual and technological capabilities of ancient Indian civilizations, fostering a rich heritage of knowledge and innovation. They also contributed to the global exchange of ideas and paved the way for the development of various scientific disciplines.

The discoveries and research in ancient India were primarily documented in Sanskrit texts, which were meticulously preserved and passed down through generations through oral traditions. Today, many of these ancient texts have been translated and published, allowing the global community to access and appreciate the scientific knowledge and achievements of ancient India.

'Scientific Heritage and the Knowledge System of India' - an initiative of Sri Aurobindo Society to conduct interdisciplinary study and research based activities to preserve the ancient and contemporary rich Indian knowledge systems.
Scientific Heritage and Knowledge System of India

आ नो भद्र: क्रवो यन्तु विष्णु:
Let noble thoughts come to us from every side.
(Rigveda 1-89-1)
